

Get Ready for Microsoft Copilot with Net-Tech!

Already a Net-Tech client? Your Copilot dependencies are covered!

Why Copilot?

AI-powered assistance
integrated into Microsoft 365

Automate
tasks

Enhance
productivity

Support data-driven
decisions

Considerations Before Takeoff

Eligible Microsoft
365 subscription

Strong cybersecurity
practices in place

Clear data
governance

Key Things to Remember When Using Copilot

- ▶ Master effective communication with your requests
- ▶ Always fact-check Copilot's insights
- ▶ Human judgement is irreplaceable - use AI as a supplement
- ▶ Guard your privacy and confidential data diligently

Total Care Cloud

Total Care Cloud Essentials

- Least access security
- Role based permissions

Total Care Cloud Enhanced Security

- Critical for organizations storing data
in a public cloud for their protection
- Protects the data you are analyzing
with Copilot tools

Total Care Cloud Managed Security

- Control, audit and access tools
safeguarding against user mistakes
- Watching over your data with
greater access restrictions
